Tips for hosting your own workshop:

Download all the documents you need by clicking the links on the left of this page.

Engage the staff first to see what they want and need from a leadership workshop. This gives them ownership.

On the day remember to set the scene; get the environment right with enough time and agree commitments and outcomes.

Create positive action going forward using the action plan.

Ask for honest, open and transparent feedback at the end of the workshop.

Schedule an action review a few weeks later so that people are able to put it into practice and then share.

Watch the webinar back by clicking the link below to refresh you.
